## PROFESSIONAL SUMMARY

Results-driven Senior QA professional with 13+ years of experience across healthcare RCM, legal tech, banking, and GIS domains. Currently upskilling into test automation engineering — adding Python-based Selenium/Playwright automation, CI/CD pipeline integration, and AI/ML model testing to a deep foundation of manual QA, API testing, and IDP/OCR validation. Proven track record leading quality initiatives on high-volume, compliance-critical systems. Seeking QA Lead or SDET roles targeting ₹18–22 LPA.

## AI & EMERGING TECHNOLOGY SKILLS

|                             |                                                                                                      |
|-----------------------------|------------------------------------------------------------------------------------------------------|
| <b>AI/ML Testing</b>        | LLM output validation, prompt testing, functional & regression testing of AI/ML pipelines            |
| <b>IDP &amp; OCR QA</b>     | Testing Intelligent Document Processing and OCR engines for healthcare RCM and legal workflows       |
| <b>RPA &amp; Automation</b> | UiPath Test Suite, RPA testing with Studio Pro (v2020.10), automation bot development and validation |
| <b>AI Tools in QA</b>       | AI-assisted test case generation, anomaly detection, smart defect triage and analysis                |

## CORE TECHNICAL SKILLS

|                          |                                                                                                            |
|--------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Automation (NEW)</b>  | Python (learning) · Selenium WebDriver · Playwright (learning) · Pytest · Selenium IDE ★ <b>New</b>        |
| <b>CI/CD (NEW)</b>       | Jenkins · GitHub Actions · Azure Pipelines — integrating automated test suites into pipelines ★ <b>New</b> |
| <b>Performance (NEW)</b> | JMeter · k6 — load, stress, and spike testing for REST APIs and web applications ★ <b>New</b>              |
| <b>API Testing</b>       | Postman · Swagger · Newman — REST/GraphQL validation, schema testing, contract testing                     |
| <b>Database Testing</b>  | MS SQL · Oracle SQL · PostgreSQL — data integrity, backend validation, query-level verification            |
| <b>Testing Types</b>     | Functional · UI · Regression · Integration · System · API · E2E · Security basics · Accessibility          |
| <b>Bug Tracking</b>      | JIRA · Azure DevOps · BugHerd · Mantis · Asana · Marker.io · TestRail (learning)                           |
| <b>Platforms</b>         | Windows · macOS · Android · iOS                                                                            |
| <b>Methodology</b>       | Agile-Scrum — sprint planning, stand-ups, retrospectives, shift-left testing                               |
| <b>Collaboration</b>     | Git · MS Office · Azure DevOps Boards                                                                      |

## PROFESSIONAL EXPERIENCE

### Senior Quality Analyst → QA Lead (Target) | Provana

Apr 2021 – Present | Noida, UP

- Led end-to-end quality assurance for web and mobile applications across legal document automation and healthcare RCM domains.

- ▶ Performed advanced API testing using Postman and Swagger — validating REST endpoints for correctness, performance, schema compliance, and security edge cases.
- ▶ Drove IDP/OCR QA initiatives including PII redaction validation, improving processing accuracy and HIPAA compliance.
- ▶ **Upskilling:** Developing Python + Selenium automation scripts to migrate high-frequency regression test cases from manual to automated execution.
- ▶ **Upskilling:** Integrating test suites into Azure Pipelines for continuous testing as part of CI/CD shift-left adoption.
- ▶ Executed database testing on MS SQL and PostgreSQL to validate data integrity across complex multi-step workflows.
- ▶ Authored test strategies, test plans, and detailed defect reports; led sprint ceremonies as QA representative.

#### Key Projects:

- **TABAK Automation:** Streamlined high-volume legal case management — bulk litigation, claims processing, legal intake. Owned functional and regression test coverage.
- **Gurstel Mailroom Automation:** Tested document intake, classification, and distribution for a leading US law firm. Reduced defect escape rate significantly.
- **IDP OCR – Healthcare RCM:** Led QA for AI-driven PII redaction automation. Validated OCR accuracy and compliance, ensuring HIPAA-grade data handling.
- **iHealth – Healthcare RCM:** Built test scenarios for claims processing workflows, improving throughput efficiency across RCM cycles.
- **BPA Work Management Tool:** Owned testing for User Management, Role Management, Process Management, and File Inbox modules.
- **Zoom Info Process:** Validated automation bot for lead generation — reduced credit usage and improved marketing funnel efficiency.
- **ICConnect247:** Tested debt repayment process flows, reducing operational errors and improving customer experience.
- **Heavner Foreclosure & Therabill:** End-to-end functional and data validation for billing accuracy in legal and healthcare billing systems.

#### Test Analyst / Software Test Engineer | Trigyn Technologies Ltd

Apr 2013 – Feb 2021 | Mumbai, Maharashtra

- ▶ Designed and executed 500+ manual test cases for banking, e-commerce, and GIS mapping applications.
- ▶ Delivered functional, UI, and regression testing across multiple concurrent projects in Agile environments.
- ▶ Provided comprehensive defect reporting and root cause analysis via JIRA; collaborated directly with dev and BA teams.

#### Key Projects:

- **John Deere – Lead Management System:** Manual test coverage for customer inquiries, lead tracking, and CRM workflows across 8 regional modules.
- **TOMTOM QA-Rules (GIS):** Validated geospatial mapping data accuracy; executed functional tests on rule engine outputs.
- **Citibank – Fundro Maintenance:** Manual functional testing for critical banking application maintenance — zero P1 defects in production post-release.

### CERTIFICATIONS & TRAINING

- ▶ UiPath Certified — Application Testing with UiPath, Diploma: UiPath Test Suite, RPA Testing with Studio Pro (v2020.10)
- ▶ **Target:** ISTQB Foundation Level — In progress (target certification for ₹20 LPA market positioning)
- ▶ Provana Certified — Agile Methodologies, Functional Testing, Manual Testing
- ▶ NIIT Certified — Core Java & Advanced Java
- ▶ **In Progress:** Python for Test Automation — Self-learning via Udemy / Coursera (Selenium + Pytest stack)

### EDUCATION

**Master of Computer Applications (MCA)** — Maharishi Dayanand University, Rohtak

2006

---

**Career Note:** Actively bridging from senior manual QA to test automation engineering. Currently building a Python + Selenium + CI/CD portfolio project (healthcare data validation pipeline). Available to demonstrate automation work samples on request.
